witty and thought provoking two vatican astronomers shed provocative light on some of the strange places where religion and science meet imagine if a martian showed up all big ears and big nose like a child s drawing and he asked to be baptized how would you react pope francis may 2014 pope francis posed that question without insisting on an answer to provoke deeper reflection about inclusiveness and diversity in the church but it s not the first time that question has been asked brother guy consolmagno and father paul mueller hear questions like that all the time they re scientists at the vatican observatory the official astronomical research institute of the catholic church in would you baptize an extraterrestrial they explore a variety of questions at the crossroads of faith and reason how do you reconcile the the big bang with genesis was the star of bethlehem just a pious religious story or an actual description of astronomical events what really went down between galileo and the catholic church and why do the effects of that confrontation still reverberate to this day will the universe come to an end and could you really baptize an extraterrestrial with disarming humor brother guy and father paul explore these questions and more over the course of six days of dialogue would you baptize an extraterrestrial will make you laugh make you think and make you reflect more deeply on science faith and the nature of the universe

in the twenty first century the debate about life on other worlds is quickly changing from the realm of speculation to the domain of hard science within a few years as a consequence of the rapid discovery by astronomers of planets around other stars astronomers very likely will have discovered clear evidence of life beyond the earth such a discovery of extraterrestrial life will change everything knowing the answer as to whether humanity has company in the universe will trigger one of the greatest intellectual revolutions in history not the least of which will be a challenge for at least some terrestrial religions which religions will handle the discovery of extraterrestrial life with ease and which will struggle to assimilate this new knowledge about our place in the universe some religions as currently practiced appear to only be viable on earth other religions could be practiced on distant worlds but nevertheless identify both earth as a place and humankind as a species of singular spiritual religious importance while some religions could be practiced equally well anywhere in the universe by any sentient beings weintraub guides readers on an invigorating tour of the world s most widely practiced religions it reveals what if anything each religion has to say about the possibility that extraterrestrial life exists and how or if a

particular religion would work on other planets in distant parts of the universe

in both literature and film mutants androids and aliens have long functioned as humanity's other nonhuman bodies serving as surrogates to explore humanity's prejudice bigotry and hatred scholars working in fields of feminism ethnic studies queer studies and disability studies among others have deconstructed representations of the othered body and the ways these fictional depictions provide insight into the contested terrains of identity subjectivity and personhood in science fiction more broadly and the superhero genre in particular the fictional other often a superhero or a villain is juxtaposed against the normal human and such others have long been the subject of academic investigation author james a tyner shifts this scholarly focus to consider the ordinary humans who ally with or oppose othered superheroes law enforcement officers military officials politicians and the countless nameless civilians are all examples of humans who try to make sense of a rapidly changing more than human and other than human universe the resulting volume mutants androids and aliens on being human in the marvel cinematic universe provides a critical posthumanist reading of being human in the marvel cinematic universe mcu centering the mcu's secondary human characters including matthew ellis ellen nadeer rosalind price as well as jimmy woo sadie deever holden radcliffe and others tyner considers how these characters attempt to monitor incarcerate or exterminate those beings considered unnatural and thus threatening placing into conversation posthumanism environmental ethics and myriad philosophical and biological ontologies of life and death tyner maintains that the superhero genre reflects the current complexities of meaningful life and of what happens in society when the human is no longer the unquestioned normative standard

the gendered cyborg explores the relationship between representation technoscience and gender through the metaphor of the cyborg the contributors argue that the figure of the cyborg offers ways of thinking about the relationship between culture and technology people and machines which disrupt the power of science to enforce the categories through which we think about being human male and female taking inspiration from donna haraway's groundbreaking manifesto for cyborgs the articles consider how the cyborg has been used in cultural representation from reproductive technology to sci fi and question whether the cyborg is as powerful a symbol as is often claimed the different sections of the reader explore the construction of gender categories through science

the interaction of technoscience and gender in contemporary science fiction film such as *Blade Runner* and the *Alien* series debates around modern reproductive technology such as ultrasound scans and IVF assessing their benefits and constraints for women issues relating to artificial intelligence and the internet

the recent discoveries of extrasolar planets and possible microfossils in martian meteorite ALH 84001 are only the latest developments in a debate that spans millennia and that has been especially heated in the twentieth century from the furore over Percival Lowell's claim of canals on Mars at the beginning of the century to the biological experiments of the Viking spacecraft the controversial Mars rock and the sophisticated search for extraterrestrial intelligence SETI at its end otherworldly life has often titillated and occasionally consumed science and the public so too have crucially related areas such as the search for planetary systems the quest for an explanation of UFOs and inquiries into the origin of life the theme has been elaborated in science fiction from H.G. Wells to Arthur C. Clarke and resulted in some of the most popular films of all time including *ET: The Extra-Terrestrial*, *Independence Day* and *Contact* life on other worlds details in a readable and non technical manner the history of the twentieth century extraterrestrial life debate one of the pervasive themes of our century

while the connections between science fiction and race have largely been neglected by scholars racial identity is a key element of the subjectivity constructed in American SF in his Mars series Edgar Rice Burroughs primarily supported essentialist constructions of racial identity but also included a few elements of racial egalitarianism writing in the 1930s George S. Schuyler revised Burroughs' normative SF triangle of white author white audience and white protagonist and promoted an individualistic highly variable concept of race instead while both Burroughs and Schuyler wrote SF focusing on racial identity the largely separate genres of science fiction and African American literature prevented the similarities between the two authors from being adequately acknowledged and explored beginning in the 1960s Samuel R. Delany more fully joined SF and African American literature Delany expands on Schuyler's racial constructionist approach to identity including gender and sexuality in addition to race critically intertwining the genres of SF and African American literature allows a critique of the racism in the science fiction and a more accurate and positive portrayal of the scientific connections in the African American literature

connecting the popular fiction of burroughs the controversial career of schuyler and the postmodern texts of delany illuminates a gradual change from a stable essentialist construction of racial identity at the turn of the century to the variable social construction of poststructuralist subjectivity today
